- HTML5
- CSS3

ABOUT ME

Full Stack Web Developer with a strong technical foundation in modern frontend frameworks like React and backend technologies including Node.js, Express, and SQL. Skilled in end-to-end web application development, from designing responsive UI/UX to structuring efficient database schemas and integrating third-party APIs.

WORK EXPERIENCE

Software Engineering Intern MAY 2026 - PRESENT
Dir Ace Technology

- Collaborated in an 8-member Agile team to engineer full-stack features using Spring Boot, React, and TypeScript.
- Developed RESTful backend API endpoints in Spring Boot to ensure efficient business logic execution and data flow.
- Built responsive, type-safe UI components with React and TypeScript, streamlining client-side data integration.

MBTI-Based Career Matching & Job Portal Nov 2025- Mar 2026
Academic Project at UIT

- Engineered a full-stack job portal using React, Node.js, and MongoDB to deliver personalized career recommendations based on MBTI personality compatibility.
- Implemented secure JWT authentication and role-based access control (RBAC) to support separate workflows for job seekers and administrators.
- Designed RESTful APIs in Express.js to power real-time personality assessments, job posting management, and application tracking.

Digital Marketplace E-Commerce System July 2024- Sep 2024
Academic Project at UIT

- Engineered a full-stack e-commerce platform using React, Spring Boot, and MySQL featuring secure JWT authentication, shopping cart workflows, and order processing.
- Integrated real-time buyer-seller chat using WebSockets, enabling instant messaging for product inquiries and buyer-seller price negotiations.
- Designed RESTful APIs and MySQL database schemas to handle multi-entity data persistence for users, messaging history, inventory, and orders.

EDUCATION

Bachelor of Science in Computer Science Expected : May , 2027
Software Engineering | University of Information Technology - UIT
